

Your employee is interested in learning new skills with AMA. Beyond helping you both achieve your goals, here's why that's an excellent idea.

AMA Seminars offer your employee:

- **Extensive practice in a supportive environment.** You really can't learn new skills from an app. You need to experience it, practice it, and get personal attention to the details that make a difference. There is simply no substitute for learning by doing.
- **Feedback from experts.** Our instructors are not professors—they are practitioners in the field, focused on what works now in the real world. Participants agree instructors make a difference and have rated our faculty 4.83 out of 5 stars. What's more, your employee will be learning alongside peers from other organizations gaining insight and knowledge from other industries and expanding their professional network.
- **Tools and techniques designed to improve performance.** Our courses are instructionally designed to make a difference in performance, which is why 99% of participants report they are using what they learned back on the job after taking one of our courses.
- **An Experience.** Yes, we know two or three days seems like a lot. But dedicating that time to truly master new skills is worth the time and money. And we're not just saying that—our customers agree: 98% of participants would come back for another course.

Still feel like you can't spare your employee for a training session?

Either way, remember that we don't lecture—we accelerate performance.

Assertiveness Training for Women in Business

Speak out with confidence—Become an Assertive Business Woman.

Assertiveness techniques, when used effectively, can make almost every aspect of your job and life better—but knowing which tools and techniques to use, and how and when to use them, is critical. AMA's assertiveness training for women addresses the unique challenges women face in business and how the effective use of assertiveness techniques is essential for survival and advancement. With these skills, you can increase the likelihood that you will send the right signals and get the right responses. They can help you command respect while being respectful, and handle almost any situation you're likely to encounter without seeming overbearing.

AMA's assertiveness training for women gives you the opportunity to practice fundamental assertiveness skills and to share your concerns with other women in a supportive and encouraging learning environment. You'll assess your leadership style and then apply the new skills and tools you learn directly to one of your own challenges, receive feedback, and refine your skills through videotaped practice. Return to work with a complete and flexible plan for achieving the kind of assertiveness your position demands.
