

Your employee is interested in learning new skills with AMA. Beyond helping you both achieve your goals, here's why that's an excellent idea.

AMA Seminars offer your employee:

- **Extensive practice in a supportive environment.** You really can't learn new skills from an app. You need to experience it, practice it, and get personal attention to the details that make a difference. There is simply no substitute for learning by doing.
- **Feedback from experts.** Our instructors are not professors—they are practitioners in the field, focused on what works now in the real world. Participants agree instructors make a difference and have rated our faculty 4.83 out of 5 stars. What's more, your employee will be learning alongside peers from other organizations gaining insight and knowledge from other industries and expanding their professional network.
- **Tools and techniques designed to improve performance.** Our courses are instructionally designed to make a difference in performance, which is why 99% of participants report they are using what they learned back on the job after taking one of our courses.
- **An Experience.** Yes, we know two or three days seems like a lot. But dedicating that time to truly master new skills is worth the time and money. And we're not just saying that--our customers agree: 98% of participants would come back for another course.

Still feel like you can't spare your employee for a training session?
Take a look at [our live online courses](#) which minimize time away from work.

Either way, remember that we don't lecture—we accelerate performance.

ITIL® Service Lifecycle: Continual Service Improvement

Develop and Adjust Your IT Services and Processes to Changing Business Needs.

The ability to align and realign IT Services to changing business needs is essential your IT department and larger business at whole. This seminar covers the overall concepts, processes, policies, and methods of the Continual Service Improvement (CSI) phase in the Service Lifecycle. Using a scenario-based teaching approach, you will learn how to manage the activities and techniques within the CSI Stage. After completing the course, you will be well positioned to successfully complete the associated exam, which is offered on the last day of the course. All content adheres to IT Infrastructure Library (ITIL) best practices.

Please note: The ITIL v3 Foundation certification is required to take the exam at the end of class. Proof of certification must be provided no later than the first day of class.

What You Will Cover

- Service Management as a practice and CSI principles, purpose, and objective
- How all CSI processes interact with other Service Lifecycle processes
- The sub-processes, activities, methods, and functions used in each of the CSI processes \
- Roles and responsibilities within CSI and the activities and functions to achieve operational excellence
- How to measure CSI performance
- Technology and implementation requirements in support of CSI
- The challenges, critical success factors, and risks related with CSI

Who Should Attend

IT operations, technical, or IT management personnel requiring more information about ITIL best practices or anyone responsible for managing, implementing, or consulting on ITIL processes within IT or in conjunction with IT.

Schedule

- [3] days - \$2,695 Non Members
- [3] days - \$2,695 AMA Members
- [3] days - \$2,695 GSA
